zorvyn fintech

Dear Kishan,

I hope you are progressing well with the task I assigned previously. As part of your initial training, you were required to purchase the MutaCryptor Lite or Pro software licence and develop a clear understanding of how their features and functionalities work. The objective was for you to analyse the software's workflow and feature set in depth so that you can brainstorm better ideas and features for our solution to be more competitive.

The task cannot be completed without actually using the MutaCryptor software. The purpose of the task is specifically to evaluate your hands on experience with the tool, not theoretical knowledge about it.

However, upon checking I noticed that no valid reimbursement claim has been submitted from your end for MutaCryptor Lite or Pro, which means the system does not have any record of you purchasing the MutaCryptor software.

Please complete the software purchase from https://mutaengine.cloud/mutaCryptorPro and submit the reimbursement form at the earliest. The reimbursement form not only processes the reimbursement amount to you for the software you purchased but also serves as an official record confirming that you own the software required for the project. Everyone working on the project is expected to formally own the tools specified in the project requirements. Without this confirmation on record, I will not be able to add you to the project's team group, which means you will not have access to project resources, internal discussions, or upcoming project meetings. Kindly complete this step so that I can proceed with adding you to the team.

Revised Deadlines

Task and Reimbursement Submission	16th April 2026
Project's Team Meeting	17th April 2026

The software purchase is fully reimbursed by the company, so there is no financial cost on your end. Please proceed with purchasing the software from mutaengine.cloud, submit the reimbursement form using the links below, and then complete the task using the actual software.

MutaCryptor Lite MutaCryptor Pro

MutaCryptor Lite: http://localhost:3003/reimbursements/approved?full_name=[redacted]&email=[redacted]%40gmail.com&employee_id=ZRVA5KXSIV&role=Cybersecurity+Analyst+Intern&manager_name=Mudiwa+Mkonto&software_name=MutaCryptor+Lite&software_vendor=MutaEngine&reimbursement_code=2026%2FW09KZAJB6EG1

MutaCryptor Pro: http://localhost:3003/reimbursements/approved?full_name=[redacted]&email=[redacted]%40gmail.com&employee_id=ZRVA5KXSIV&role=Cybersecurity+Analyst+Intern&manager_name=Mudiwa+Mkonto&software_name=MutaCryptor+Pro&software_vendor=MutaEngine&reimbursement_code=2026%2FFNNLVRG48CTT

If a valid submission is not made by the revised deadline, it will be considered that you are not working diligently on the task and project initial requirements. In such cases, I may have to put you on hold in the project or revoke your offer letter from your role at Zorvyn.

If you are facing any difficulties with the purchase or reimbursement process, please let me know and I will help you resolve the issue.

Best regards,
Mudiwa Mkonto

Dear Mudiwa,

Thank you for the clarification.

I would like to inform you that I am not comfortable making any upfront payment for software as part of the internship process. I would prefer to proceed only if the required tools are provided directly by the company.

Please let me know if there is an alternative way to continue.

Best regards,
Kishan
